

# Volume du cône, de la pyramide et de la sphère

Calcule le volume de chaque pyramide en utilisant la formule.

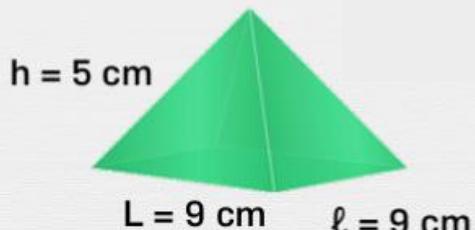

$$\text{Volume de la pyramide : } V = \frac{a^2 \times h}{3}$$

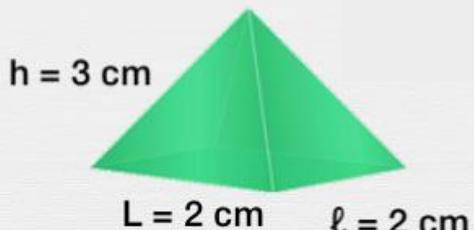

$$V \approx \frac{\boxed{\phantom{0}}^2 \times \boxed{\phantom{0}}}{3}$$
$$V \approx \boxed{\phantom{000}}$$
$$V \approx \boxed{\phantom{000}} \text{ cm}^3$$

$$V \approx \frac{\boxed{\phantom{0}}^2 \times \boxed{\phantom{0}}}{3}$$
$$V \approx \boxed{\phantom{000}}$$
$$V \approx \boxed{\phantom{000}} \text{ cm}^3$$

$$V \approx \frac{\boxed{\phantom{0}}^2 \times \boxed{\phantom{0}}}{3}$$
$$V \approx \boxed{\phantom{000}}$$
$$V \approx \boxed{\phantom{000}} \text{ cm}^3$$

$$V \approx \frac{\boxed{\phantom{0}}^2 \times \boxed{\phantom{0}}}{3}$$
$$V \approx \boxed{\phantom{000}}$$
$$V \approx \boxed{\phantom{000}} \text{ cm}^3$$
