

Volume du cône, de la pyramide et de la sphère

Calcule le volume de chaque sphère en utilisant la formule.

$$\text{Volume de la sphère : } V = \frac{4 \times \pi \times r^3}{3}$$

$$r = 3 \text{ cm}$$

$$V \approx \frac{4 \times 3,14 \times \boxed{}^3}{3}$$

$$V \approx \boxed{} \quad \text{cm}^3$$

$$V \approx \boxed{} \quad \text{cm}^3$$

$$r = 6 \text{ cm}$$

$$V \approx \frac{4 \times 3,14 \times \boxed{}^3}{3}$$

$$V \approx \boxed{} \quad \text{cm}^3$$

$$V \approx \boxed{} \quad \text{cm}^3$$

$$r = 4 \text{ cm}$$

$$V \approx \frac{4 \times 3,14 \times \boxed{}^3}{3}$$

$$V \approx \boxed{} \quad \text{cm}^3$$

$$V \approx \boxed{} \quad \text{cm}^3$$

$$r = 5 \text{ cm}$$

$$V \approx \frac{4 \times 3,14 \times \boxed{}^3}{3}$$

$$V \approx \boxed{} \quad \text{cm}^3$$

$$V \approx \boxed{} \quad \text{cm}^3$$
